QUICK START GUIDE

Winning Sports Picks and Predictions

Sports Investing Software Proven since 1999

(Version 1.2 revised)

(updated based on the new hot trends found by our best expert Robert)

A Word of Warning:

This Money Making system is very simple to apply, however you **MUST** read this manual carefully. We know you are eager to get going and make money right away but we need to minimize the beginners errors quickly. So please:

A.) **Read this manual carefully. All the way!** Then get grab yourself a cup of coffee and do the following:

READ the whole manual AGAIN! I am serious.. read it all over again and absorb the information.. Then:

B.) **Print the QUICK Reference Guide out!** It's further down this manual and it includes everything you need to know for the system to work. Keep it handy and check it carefully before placing any bets!

We wish you a ton of success!

Mike, Steve and the Crew behind Z-Code

What is the Zcode ? Why is it free?

The Zcode is our newest development – a winning sports investing software that can predict games and results with extremely high accuracy. You place the bets according to the recommendation and win. The same approach is used in Forex, that's why we call it sports investing, not gambling. Actually we come out of the Forex scene (having developed one of the most successful forex robots called fapTurbo, selling over 80,000 copies of it. (google it if you're interested, it's a worldwide phenomenon) but we found out that you can apply automation also in the sports betting.

No matter if you love sports or have no clue about sports you can win with us. It's much easier than you think. Let us show you how.

Proven since 1999

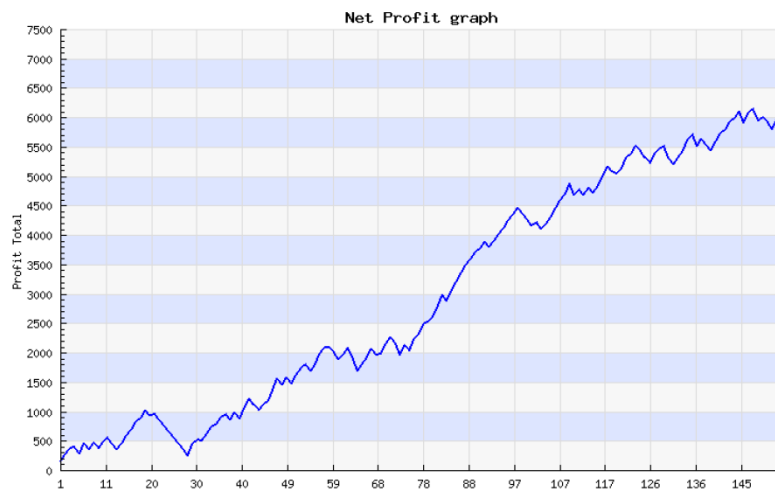

Zcode is a fully transparent winning system proven since 1999. The betatesters have already backtested it all way back 12 years and now they are forward testing it publicly with great results.

Here is the link to download the full live performance since October 2011:

+ \$5,889 by betting fixed \$100 bets so far!

www.zcodesystem.com/zcodesystem_performance_nhl.pdf

This report is 100% real and untampered. We will update it regularly to show you why Z-code is the answer to make money consistently in the sports world, without any knowledge or any skills.. you can use a mouse? You can do it! :)

(again, this is not a backtest, this is actual verified performance)

Looks great? I bet it does. Now it's time to show you how you can win with us. While system is in BETA mode we publish all our predictions on Facebook for free so everyone can verify and follow them!

Once our site is ready to go live, the system will be offered to our selected group of Betatesters (you!)

We want to make you WIN and make cash before we close the system from the public eyes and share it only with our "inner circle" (YOU).

So let's get going, shall we?

Step 1: Open bookie accounts

Bookmaker or bookie for short is a place where you are doing your sports investing trades (bets).

You don't need to open many accounts – you can start with just one or two of the best bookies.

Make sure that your bookie offers -1 spread lines bet for NHL (puck line). Here is the list of bookies that qualified and offer all necessary bet types we need to win:

- 5Dimes.com (A+ world bookie, accepts US members) – offers all kinds of bets that we need
- Bet365 (One of the most popular bookies) Pros&Cons: offers good spreads but no team totals
- Pinnacle (World top bookie, best lines. Does not accept US players) does not have team totals and underdog-1 spreads
- Bookmaker.EU (A+ bookie, Accepts US members) offers team totals but no -1 spreads.

- [William Hill](#) (A+ bookie, does not accept US members) offers team totals but no -1 spreads

You don't have to fund it with thousands, you can start as small as \$100 betting \$1 bets or \$1,000 betting \$10 bets

Step2: Follow ZCode predictions

While we are in Beta mode every day we are publishing our NHL predictions on Facebook. We have nothing to hide – all our results are public and fully verified.

If you are not into sports this might look complicated but let it not scare you away otherwise you will miss all the profits our members get!

Here is how to use these predictions to win.

We **only** bet 2 trends on NHL for now:

1. **4-5 Star Home Game Winners (Favorites) by Moneyline (means to win), -1 spread line (means to win by 2 goals or more) and Team Total Over 2.5**

(Results since October 2011) **+3,020**

- 5 Star Road Underdogs by Moneyline** (underdog is a team with higher odds here playing away from home, on the road) and **Team Total over 2.5** and **-1 spread**

(Results since October 2011) **+3,210**

That's all we need to win for now. We are very selective; usually we have 1-2 bets per day or less. Do not bet any other predictions or recommendations such as Game Totals (Over/Under) etc

Lets concentrate on those trends that bring the most profit, right!

Important! We post also other bets (2-3 star bets!) Do NOT Bet those! They are just for professionals to discuss about! They are not part of the money making system.. only the 4-5 star bets are!

Now let me give you examples and explain it:

- 4-5 Star Home Game Winners (Favorites) by moneyline, -1 spread line and Team Total over 2.5**

Find predictions where home favorite has 4 or 5 stars and the system gives you recommendation like *Chicago Moneyline (1.53)*

Good opportunity for -1 or -1.5 Spread Bet on Chicago

Orange stars:

Powered by ZCodeSystem.com

As you can see Chicago got 5 star, it's a home team (**Home teams are always listed second**) and it has the necessary recommendation.

Now lets place the bet. We are placing NHL bets called “**Overtime and Shootout Included**”.

What amount to bet – if you are new to the system then bet a fixed 1% of your bankroll per bet! If you are a pro sports investor I have prepared a long boring article on money management in the end of the guide ;)

So our bet would be:

5 unit Chicago Moneline

5 unit Chicago -1 Spread

5 unit Chicago Team Total Over 2.5

Note: If you bookie does not offer team totals you can switch to [5Dimes](#), [William Hill](#) or [Bookmaker.EU](#) or simply ignore team totals.

<http://youtu.be/vsYzr80taZw> – how to place bets

5Dimes example

Here is how to do it in [5Dimes.com](#):

Go to Bet-The-Board and click NHL and Continue

The screenshot shows the 'Bet the Board' section of the 5Dimes website. The 'NHL' checkbox is checked and highlighted with a yellow box. The interface includes a navigation menu on the left with options like 'Straight & RIF', 'Parlay', 'Teaser/Progressi...', 'If Bets', 'Action Reverse', 'Futures', 'Office Pools', and 'Review Bets'. The main area displays a grid of sports and betting options, including Football, Basketball, Hockey, Soccer, Golf, Tennis, Fighting, and Other Sports. Under Hockey, the 'NHL' checkbox is checked, and there are also options for 'Reduced', 'International', 'Japan', 'Portugal', and 'Futures'. A 'Continue' button is located at the bottom of the selection area.

Now find our game and place 3 bets, similar size on

- Chicago Moneyline (Moneyline means you bet on win of Chicago)

- Chicago -1 Spreadline (Also called puckline. It wins if Chicago wins the game by 2 or more goals like 2-4, 3-5 etc. In case Chicago wins by 1 goal you will get a Push (bet refund). It is really profitable and safe bet. Don't use -1.5, only -1 !
- Chicago Team Total over 2.5 (we expect them to win by 3 goals or more)

The screenshot shows the 'Bet the Board' interface for NHL Hockey. The table lists various betting options for Pittsburgh Penguins at Washington Capitals. The correct bets are highlighted in yellow.

(I marked the correct bets in yellow. Since the game in question was already finished by the time I am writing this guide I took the screenshot from similar game, that's why teams are different 😊)

Bet365 Example

Here is the screenshot of NHL moneyline and -1 Puckline from [Bet365](#) Please note they don't offer Team Totals, however you can place additional small bet Chicago-2 spread instead

The screenshot shows the Bet365 sportsbook menu. The 'Money Line' and 'Additional Puck Line' options are highlighted in yellow.

Pinnacle Example

Now example from [Pinnacle](#) Please note they don't offer Team Totals.

Choose NHL OT included

(info: Pinnacle will show a note that says "OT games are not supported from now on" but they still are so disregard that note)

Then find the game, choose -1 Handicap (Spread) and place the amounts. Please note -1 spread usually appears in the evening before the games:

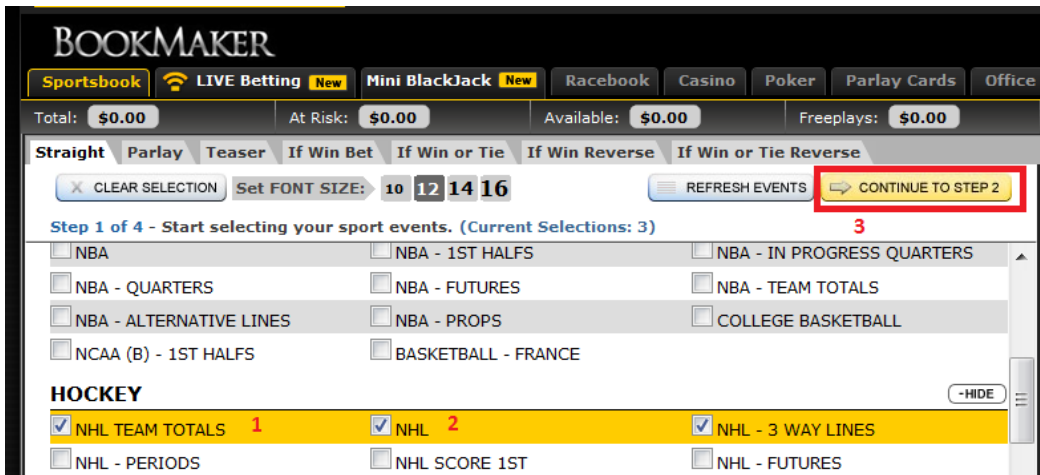

A screenshot of a betting interface showing a table of NHL games. The table has columns for 'GAME', 'HANDICAP', 'MONEY LINE', and 'TOTAL GOALS'. The 'Toronto Maple Leafs' game is highlighted with a yellow box, showing a handicap of -1 and a money line of 1.709. The 'New York Islanders' game is also highlighted with a yellow box, showing a handicap of -1 and a money line of 2.280. The 'New York Rangers' game is highlighted with a yellow box, showing a handicap of -1 and a money line of 1.909. The 'Florida Panthers' game is highlighted with a yellow box, showing a handicap of +1.5 and a money line of 1.370.

GAME		HANDICAP		MONEY LINE		TOTAL GOALS

04:05 PM	4 New York Rangers		-1 2.280		1.526		Under 5.5 1.847
Thu 12/22	5 Florida Panthers		+1.5 1.370		2.100		Over 5.5 2.170

Bookmaker.EU example

[Bookmaker.EU](#) offers great team totals but no -1 spreads, only -1.5. With -1.5 you get more losses but better odds so long term result will be similar.

Find NHL, Select Team Totals, NHL and click Continue to step 2:

Now find the game in question (I have chosen random game for example), place a bet on Moneyline (Column called Odds), Spread line -1.5 (they don't have -1)

4:05 PM	55	MONTREAL	<input type="checkbox"/> +1½ 1.74	<input type="checkbox"/> o5½ 2.20	<input type="checkbox"/> 3.10
	56	BOSTON	<input checked="" type="checkbox"/> -1½ 2.15	<input type="checkbox"/> u5½ 1.71	<input checked="" type="checkbox"/> 1.40

Then scroll and find team total:

4:05 PM	3161	BOSTON TOT GOALS	<input type="checkbox"/> o2½ 1.44
	3162	BOSTON TOT GOALS	<input checked="" type="checkbox"/> u2½ 2.85

Now click continue to step 3 and enter amounts there to place the bets!

William Hill example

[William Hill](#) offers a great variety of NHL bets including one of the best choices for Team Totals however does not offer -1 bets.

First find the game in question and click on +32 bets to see whole market. Additional bets like team totals appear in the evening!

Underdog Trend

The second trend we are betting is:

- **5 Star Road Underdogs by Moneyline** (underdog is a team with higher odds here playing away from home, on the road), **Team Total over 2.5** and **-1 Spread**

Find the predictions where away (road) team has 5 stars. **Road team is always listed first!**

It usually says “Good underdog value pick (5 Stars) on Chicago” or “Value bet: Hot underdog team Chicago” in the recommendation

Now find your team in the bookie and bet on its Moneyline (means to win), -1 spread and Team total over 2.5. Please note some bookies like Pinnacle don’t offer Underdog-1 spread bets (it is offered only by 5Dimes and Bet365) while others don’t offer Team totals. The best bookie that offers everything is 5Dimes.com

QUICK REFERENCE SHEET

- The place to get your picks → <http://www.facebook.com/pages/NHL-Predictions-by-ZCodeSystem/188996264518365> Bookmark it!
- Moneyline means “bet to win the game” In short often referenced as ML
- Spread/ Puckline / Handicap -1 means “to win by 2 or more goals. If win by 1 goal you get a Push (refund of the bet) Thats part of the system to preserve your money :)”
- Don’t bet -1.5. Always use -1 instead. It is a much safer bet because of the Push in case your team wins by only 1 goal. All qualified bookies offer -1 bet few hours before the game (**not in the morning**) Those bets usually “show up” later during the day so be patient!
- Away team is listed first, Home team is listed second
- Bet 1% of your bankroll per bet. For example for \$1000 bet \$10 bets, fixed size
- **Odds may change through the day.** That is normal. Sometimes underdog can become a favorite.
- Better to place bets few hours before the game when the situation is clear.
- Besides NHL we also offer NFL and plan to add NBA soon. MLB is supported as well.
- **Do not bet other types of bets** (Game Totals Over/under, +1.5, parlays, bets with lower amount of stars and bets for road favorites and home underdogs). Those additional types of bets are posted for experts only, you don’t need them for now!
- Do not expect to win every single day. We are doing a sports investing system with a long term profit, not a one day *get-rich scam*. You will not become millionaire overnight with it and you will have losing days and weeks. That is normal. Always see the BIG picture and remember that sports investing is a **PROCESS!** Remember, our system is a proven winner in a long run!
- Bet only 4 to 5 star Bets! Ignore the other bets unless you are “fun” Betting!

Our team

Our team has Forex background – we have developed several successful Forex robots and indicators and now we are use the Forex approach in sports. The team leaders are Mike & Steve who are experts in sports and lead the development. The company is located in Austria and the support & programming team in USA and Ukraine and India. We gathered the best talented young guys to build our team.

Our philosophy

We believe every system must have a verified performance. Only numbers prove how good the system is.

When investing in sports, it is very important to only follow our predictions. As you can see, there is losing and there is winning in this process. No one or company can or will win every day of the week/month/year. That will not happen ever!

What is important to realize is that sports investing is a **PROCESS**. When we lose several games in a row or several days in a row, that is not the time to jump off or abandon what we are doing here. **Not Ever!** When you do that, you will miss the winners that go along with the losses. These winners are crucial to building our bankroll each month. You need to follow exactly what we do each day/week/month. You need to play out program the way it is meant to be played. If you do so you will see profit each month with the system and strategy that we have employed.

We win every month! This is Documented!

(Chart shows Z code picks performance for MLB regular season)

Again, investing needs to be treated as a **PROCESS**. Only after you profit each month do you increase your wager size. To beat the “book” is one of the hardest things to accomplish on a regular basis. When you find a successful program, such as the one we have created here at Z code system, it is vital you follow that program precisely if you want to truly profit and be a winner each month. When you go off on your own and play your own plays that do not have information behind them, or “cherry pick” other services’ plays here and there that is the worst thing you can do.

In closing, allow us to reiterate some crucial key points. Stay with our proven program we have laid out for you. You will profit long term! Do not get bogged down in day-to-day affairs. Do not get too high or too low during the month. Do not jump around and play random plays in which we do not endorse. Do not chase, do not double down, and do not bet more games unless we tell you to do so. We cannot STRESS enough that this is a **PROCESS**; you need to treat it as such.

Relax, we know what we are doing. This should be a stress free process for you. When you do not get bogged down in day-to-day outcomes sports investing becomes stress free and an enjoyable experience.

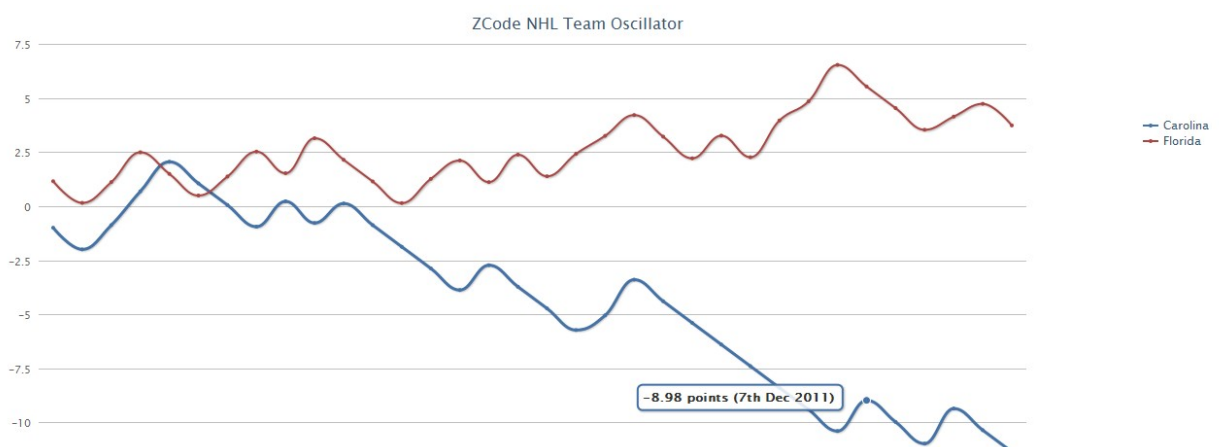

Let us worry about the day-to-day affairs. You just make your investments each day that we suggest for you. Collect at the end of each month. It’s that simple. There should be no emotion involved in this process for you. When you let emotion take over, that is when you will make bad decisions, and will lose your bankroll immediately. Follow the system, remove the emotion involved in day-to-day outcomes, and profit long term.

Lets have another profitable month!

Additional useful free tools by Zcode:

- **NHL Oscillator:** http://zcodesystem.com/nhl_oscillator/

ZCode NHL Team Strength Oscillator shows you the current team shape in a form of an easy chart. Just by looking at the chart you can compare two teams to see each team's pattern and current trend, which team is surging, which is slumping. You will also get the current team status, their last games and the difference (delta) between their conditions. The Oscillator is calculated based on the bookie odds for the closed game.

- **NHL Power rankings** http://zcodesystem.com/nhl_power_rankings.php

One of the great features of Zcode system will be automatically updated daily power rankings for NHL and weekly for NFL. They show the real condition and shape of the teams based on the internal system indicators. You can compare how they differ from the traditional Standings (Place in Ratings) that you can find on public websites like Covers or NHL.com that are usually updated weekly and become outdated too fast.

The value of such table is huge for the professional bettor because it shows you the real **CURRENT** power of the team, not the traditional "general" power shown by public standings tables. let me give you example. Team A won a lot of games in October and stays on top of the division with the big amount of points, however it lost 7 out of last 10 games. The traditional standings tables will still show a high position for the team that has collapsed and currently not playing well at all giving you fake indications of the strength!

Of course power rankings is not the only thing that matters but it is one of the most important indicators of the team current state and power.

Current rank ▲	Team	Status	Last 6 games streak	Current Standing in Sports Ratings
1	 Boston Bruins		W + W + W + W + W + L	2
2	 Chicago Blackhawks		W + L + W + W + W + W	1
3 ↑	 New York Rangers		W + W + L + L + W + W	6
4 ↑	 Vancouver Canucks		W + W + W + L + L + W	8

Ideas to maximize your profit (FOR EXPERTS ONLY)

- *When the odd is too low (for example on home favorites like Boston playing against super weak last place team) you can risk more by putting bet on "win in regulation" instead of "moneyline including OT". Usually the odd is better. Some bookies like bet365 also offer Spread-2 Bet for such games for maximizing profit*
- *On some bookies like 5Dimes you can bet super profitable bet like "underdog-1" spread. Use it for 5 star dogs to maximize the profit*
- *When your strong team is known to score a lot and a weak one has poor defense and goalie use Team Total Over 2.5 to maximize the profit*
- *When the odd is super low and you think "things are too good to be true" and expect an upset you can place a hedging parlay on the underdog moneyline parlayed with something else.*
- *Parlay "5 star underdog" on +1.5 spread with something else – it has very high winning rate.*
