## **Before you start however a word on MONEY MANAGEMENT.**

In combination with the ability to use winning predictions and picks, money management is one of the biggest factors that determines players final success or failure at the end of the season. Yet, money management is frequently overlooked, and by not exercising proper money management a player can wager on an overwhelming number of winning picks and still lose money. For truly successful wagering, both the ability to have winning picks and to exercise proper money management is essential.

### **What does money management mean?**

The concept of proper money management can seem obscure to those without a disciplined money management strategy already in place, but basically, money management involves controlling where and how much of your bankroll you put at risk throughout the season on a weekly basis. The objective, of course, is to manage your betting in such a way that making a substantial profit is as easy and risk-free as possible. Of course, risk is unavoidable, and as a result, a proper money management strategy requires discipline and proper bet sizing to minimize risk, yet still make it easy to turn a decent profit.

This is crucial to your success in the handicapper business because an overall performance of over 65% wins doesn't necessarily mean you can walk away with huge gains... managing your bankroll properly is of ESSENCE... again

### **Money Management and following the system Is Everything!**

## **Determine Your Bet Size!**

Determining your bet size, you must choose an amount small enough to withstand a losing streak, yet large enough to make a sufficient return on your bankroll.

We usually advice new members to bet 1% fixed size on each bet.

# Being a Sports Investor

When investing in sports, it is very important to only follow the system **CONSISTENTLY**. As you can see, there is losing and there is winning in this process. No one or company can or will win every day of the week/month/year. That will not happen ever!

What is important to realize is that sports investing is a **PROCESS**. When we lose several games in a row or several days in a row, that is not the time to jump off or abandon what we are doing here. **Not Ever!** When you do that, you will miss the wins that go along with the losses. These wins are crucial to building our bankroll each month. You need to follow exactly what we do each day/week/month. You need to play out program the way it is meant to be played. If you do so you will see profit each month with the system and strategy that we have employed.

**We win!** This is Documented and proven!

Treat sports investing as a business, not as a gambling.

If you follow the picks and predictions – long term your account could look like this:

*(Chart shows Z code picks performance for MLB regular season. Local ups and downs but always a profit in the end!)*

Again, investing needs to be treated as a **PROCESS**. Only after you profit each month do you increase your wager size. To beat the “book” is one of the hardest things to accomplish on a regular basis. When you find a successful program, such as the one we have created here at Z code system, it is vital you follow that program precisely if you want to truly profit and be a winner each month. When you go off on your own and play your own plays that do not have information behind them, or “cherry pick” other services’ plays here and there that is the worst thing you can do.

In closing, allow us to reiterate some crucial key points. Stay with our proven program that we have laid out for you. You will profit long term! Do not get bogged down in day-to-day affairs. Do not get too high or too low during the month. Do not jump around and play random plays in which we do not endorse. Do not chase, do not double down, and do not bet more games unless we tell you to do so. We cannot STRESS enough that this is a **PROCESS**; you need to treat it as such.

Relax, we know what we are doing. This should be a stress free process for you. When you do not get bogged down in day-to-day outcomes sports investing becomes stress free and an enjoyable experience.

Let us worry about the day-to-day affairs. You just need to make your investments each day based on what we suggest for you. Collect at the end of each month. It’s that simple. There should be no emotion involved in this process for you. When you let emotion take over, that is when you will make bad decisions, and will lose your bankroll immediately. Follow the system, remove the emotion involved in day-to-day outcomes, and profit long term. Let’s have another profitable month!

## NFL baseball Performance of ZCode:

Zcode NFL Performance: + \$25,789 Profit

Looks great? I bet it does. Now it's time to show you how you can win with us.

We want to make you WIN and make cash together. Why? Because if you win - we win as well.

We place all the bets ourselves on our accounts as well.

**So let`s get going, shall we?**

# Step 1: Open bookie accounts

Bookmaker or bookie for short is a place where you are doing your sports investing trades (bets).

You don't need to open many accounts – you can start with just one or two of the best bookies.

Sometimes I receive strange emails like "My bookies do not offer this bet type so I can't place it".

Remember you are **not married to your bookie**. The bookie exists to make you lose and make them rich! By limiting your bet types the bookie is trying to put you in disadvantage. Feel free to change bookies and move the funds! Also please remember there is no such thing as "ideal bookmaker".

Make sure that your bookie offers -1 spread lines bet for NHL (puck line). Here is the list of bookies that qualified and offer all necessary bet types we need to win:

- [5Dimes.com](http://5Dimes.com) (A+ world bookie, accepts US members) – Pros & Cons: offers all kinds of bets that we need however they usually get greedy and boost the "team totals" on NHL to 3 and even 3.5 instead of proper 2.5. Good for MLB!
- [Bet365](http://Bet365) (One of the most popular bookies) - Pros & Cons: offers good spreads even on underdogs but no team totals before the game though they offer them in-Play during the game! Good for MLB too! Does not accept US members
- [Pinnacle](http://Pinnacle) (World top bookie, best lines. Does not accept US players) does not have team totals and underdog-1 spreads. Great for MLB!
- [Bookmaker.EU](http://Bookmaker.EU) (A+ bookie, Accepts US members) offers team totals but no -1 spreads.
- [William Hill](http://William Hill) (A+ bookie, does not accept US members) offers team totals but no -1 spreads
- [Marathon](http://Marathon) and [BetCity](http://BetCity) (A+ trusted old Russian bookies). Europe and Russia are very serious on sports like Hockey, no wonder most NHL players are Russian, and provide the best bet offers in their bookies. Don't be scared to trust bookies with over 800 offline offices. Betcity has all kinds of team totals you can dream of and all spreads that ever exist.

You don't have to fund it with thousands, you can start as small as \$100 betting with \$1 bets or \$1,000 betting \$10 bets

Remember, you can visit [Zcode Members Area](#) to watch the video tutorials!

# Early and Final Predictions (Locks)

**Early Prediction.** The early predictions are a long term game forecast.

You have it ready long time before the game but it is less accurate because something can happen later: key player illness or injury, goalie/pitcher change, odd change etc that can influence the prediction.

**The Final Prediction** is ready 3 hours before the game and does not change anymore.

In 95% cases the Early and Final predictions are the same.

The early prediction is updated automatically every 2 hours as the new information arrives. The final prediction does not update anymore and is locked.

# Statuses and Stars explained

The common misunderstanding in Zcode Star rating is that Stars alone are an indication to bet. The idea of the stars is to show the value on the line, it's one of the stats but not a direct signal to bet like all newbies think they must bet all 5 star games.

Betting on stars ALONE will not work same way as betting simply based on power rankings or simply betting on hot statuses. It's all part of the stats that help get the full impression of the game and help experts form their systems. You can find and follow expert systems in the "Hot Trends" section or follow automatic Sports trader systems

- Orange Stars  are for favourites (teams that have lower odds according to bookies). By betting on favourites you have higher chance to win but the reward is smaller.
- Yellow Stars  are for underdogs (teams with odd higher than 2.0 or +100 in American. This means lower chance to win buy higher reward)
- Green Stars  (Game Totals, for experts only). Zcode can be a great helper here for you but you can't bet Totals blindly by stars, they require additional goalie and team strategy analysis. Usually teams with strong offense and good goalie tend to go Under 5.5 in NHL. You can find discussions under each game to see what experts think.

- Team Statuses  (Dead – IceCold – Average – BurningHot) show the current status of the team (Team condition). The higher status differential the better for prediction.

- Status Trends  (IceCold Down etc) show the direction the status is headed to. Obviously the "down" status is a bad sign while "Up" means the team is improving.

- Power rank  shows the current team strength where 1<sup>st</sup> is the best rank and 30<sup>th</sup> is the weakest one

- Prediction Bar  shows the zcode<sup>®</sup> simulation for the current game – the chances of the teams to win outright. The high chance to win

does not necessarily means we are going to bet on it because we also need to see the status, star amount and other factors. For underdogs we make a bet even if chance to win is less than 50% because the reward is great!

- Point spread forecast **Point Spread forecast: +1.5 (53%)** shows the chance for the weak team (underdog) to cover the +1.5 spread. Usually +1.5 chance is very high but the odd is very low which is only good for parlays.

- Prediction Hot Trends shows how Zcode predicted the last games and other useful information and supportive trends

- Nashville Moneyline (1.47) shows the possible bet ideas. Zcode gives you a big variety of ideas but if you are new to sports investing you don't have to bet ALL of them, just choose the ones that fit the Hot Trends we discuss in this guide later.

- Bookie odd approximate bookie odd for the team in Decimal international format. Click on it to switch to American format. Please remember we are not a bookmaker so the real odd in your bookie could differ little bit from the odd we posted, this does not matter at all because it's not arbing and the difference in odds do not matter. If your bookie offers American format like +120 you can always switch to decimal for easier understanding. Remember the higher odd the better reward is but the less chance to win it.

- After you place the bet in the bookie, click it to hide the prediction from the list to help you remember that you already placed it.

- Public percentages on the left of each prediction shows the real time data on how much general gambling public is betting each side. Blue = home team. Red = Away team

- Line moves shows real time odds change and line reversals.

- Public Tickets, Consensus stats. the more public bettors put money on specific team, the more chance there will be an upset because Vegas is always in profit. Be careful with games with a lot of public money.

- Trap Alerts - helps you and alerts you about possible Vegas trap games. (Where upset is most likely to happen)

- Helpful tools and indicators for specific game helps you see our tools and predictions quickly.

Lets check an **EXAMPLE** of the game prediction and how you can analyze the game (if you want to). Again, if you do not want to analyze the game yourself simply follow Automated systems or Experts on the Wall and Forum that give you **EXACT** picks.

According to Z Code Calculations, based on statistical analysis since 1999 The Nashville Predators are a solid favorite with a 74% chance to beat the Columbus Blue Jackets.

They are 15-7-3 at home this season. According to bookies the odd for Nashville moneyline is 1.47 and the spread line is -1. The calculated chance to cover the +1.5 spread for Columbus is 53.30%

Team	Status	Streak	Last 6 Games	Current Rating	Power Rank
Columbus Blue Jackets	Ice Cold Down	L + L + W + L + W + L	2 W / 4 L	30/30	29

Point Spread Bet: +1.50 (53% chance)

**Nashville Predators**  
Odd: 1.47  
Game Winner Pick: ★★★★★  
Point Spread Bet: -1.50 (47% chance)

As you can see *Nashville* got 5 star, it's a home team (**Home teams are always listed second**) and it has the necessary recommendation.

Now let's place the bet. We are placing NHL bets called "**Overtime and Shootout Included**".

**What amount to bet** – if you are new to the system then bet a fixed 1% of your bankroll per bet! If you are a pro sports investor I have prepared a long boring article on money management in the beginning of the guide ;)

So our bet would be:

1 unit *Nashville* Moneyline

1 unit *Nashville* -1 Spread (Spread -1 offer usually appears in the evening before the game)

**Addition for experts:** If you are not new to betting you can also start adding additional bets such as Team Total Over 2.5 goals. One more additional possible bet is TTOU2.5 which means "opponent team's team total under 2.5". These additional bets require extra attention and knowledge. If you are totally new just skip them. No problem! You will learn fast!

1 unit *Nashville* Team Total Over 2.5 (additional bet)

1 unit *Columbus* Team Total Under 2.5 (additional bet)

**Note:** If your bookie does not offer team totals you can switch to 5Dimes, William Hill or Bookmaker.EU

or simply ignore team totals. Beware of bookies boosting team totals to 3.5 – avoid such bets.

## 5Dimes example

Here is how to do it in [5Dimes.com](http://5Dimes.com):

Go to Bet-The-Board and click NHL and Continue

Now find our game and place 3 bets, similar size on

- Nashville Moneyline (Moneyline means you bet on win of Nashville)
- Nashville -1 Spreadline (Also called puckline. It wins if Nashville wins the game by 2 or more goals like 2-4, 3-5 etc. In case Nashville wins by 1 goal you will get a Push (bet refund). It is really profitable and safe bet. Don't use -1.5, only -1 !)
- Optional: Nashville Team Total over 2.5 (we expect them to score 3 goals or more)

(I marked the correct bets in yellow. Since the game in question was already finished by the time I am writing this guide I took the screenshot from similar game, that's why teams are different 😊)

# Pinnacle Example

Now example from [Pinnacle](#) Please note they don't offer Team Totals.

Choose NHL OT included

(info: Pinnacle will show a note that says "OT games are not supported from now on" but they still are so disregard that note)

Then find the game, choose -1 Handicap (Spread) and place the amounts. Please note -1 spread usually appears in the evening before the games:

## Bookmaker.EU example

[Bookmaker.EU](#) offers great team totals but no -1 spreads, only -1.5. With -1.5 you get more losses but better odds so long term result will be similar.

Find NHL, Select Team Totals, NHL and click Continue to step 2:

The screenshot shows the Bookmaker website's betting interface. At the top, there are navigation tabs for Sportsbook, LIVE Betting, Mini BlackJack, Racebook, Casino, Poker, Parlay Cards, and Office. Below these, there are account balance indicators: Total: \$0.00, At Risk: \$0.00, Available: \$0.00, and Freeplays: \$0.00. A menu of bet types is visible: Straight, Parlay, Teaser, If Win Bet, If Win or Tie, If Win Reverse, and If Win or Tie Reverse. A 'CONTINUE TO STEP 2' button is highlighted with a red box. The main area shows 'Step 1 of 4 - Start selecting your sport events. (Current Selections: 3)'. Under the 'HOCKEY' section, the following options are checked: NHL TEAM TOTALS 1, NHL 2, and NHL - 3 WAY LINES.

Now find the game in question (I have chosen random game for example), place a bet on Moneyline (Column called Odds), Spread line -1.5 (they don't have -1)

Now click continue to step 3 and enter amounts there to place the bets!

# William Hill example

# Marathon bet example

It's a popular Russian bookmaker, one of the biggest in the western Europe with hundreds of offline offices.

Their site looks crappy but they have very good odds and rules which makes them attractive to us. Fast payouts, accepts all countries as far as I know.

Very interesting facts about Marathon that make things easier to win for us:

## 1. Team totals are counted **ONLY IN REGULATION TIME.**

This means that winning Team Total Under 2.5 is much easier in Marathon because Shootout/Overtime goals are not counted.

This means if your team ends regular time 2-2 and then loses in OT/SO by 2-3 score you still WIN! However Team Totals Over 2.5 better to place elsewhere.

2. +1 Handicap is counted **ONLY** in regulation too! So it's an easy win if your team ends a game 2-2 and loses in overtime you get a win instead of a Push like on other bookies

3. Game Totals Under 5.5/5 Over 5.5/5 are counted **ONLY IN REGULATION TIME** (yes, confirmed with support). Which means winning Under is much easier here but winning over is harder because OT/SO goal is not added!

## Conclusion

Place +1, Team Total Under 2.5 and Game Under 5.5 in Marathon.

Don't place -1 Bets, Team Total Over 2.5 and Game Over 5 in Marathon.

Here is how to do it : Placing -1 Spread

## Frequently Asked Questions

**1. I am a newbie and I don't know where to start?**

**Ans:** For newbies, we always recommend you to start with our [Top Systems](#) first (you'll find it listed under the **Hot Trends** menu option) and the [VIP Picks](#) tab. These are the best places to start with in order to get a hang of how our sports-betting systems work.

Also, please take the time to go through the Fast-Start webinar and the detailed video tutorials we have for you here: <http://zcodesystem.com/vipclub/tutorials.php>

**2. I am unable to access the Fast-Start Insider webinar?**

**Ans:** Please check if you have the latest version of Flash updated for your browser and temporarily deactivate any AV or plugins that might be blocking the flash player from loading up. Otherwise, simply access the webinar from a different updated browser. Login to the Zcode VIP area and try again here: <http://zcodesystem.com/insiderwebinar/>

**3. What is the bankroll I need to start?**

**Ans:** If you simply wish to test the waters, then all you need is \$100 initially. But if you're serious about making profits with our Z-Code System and to cover your costs, we'd recommend that you start with at least \$500 to \$1000. Our usual stake size is \$100 per unit for most of our popular and best systems, but the stake on each bet can vary based on the number of units recommended by Sports Trader or by the Expert who runs that system, but this can be modified based on the level of RISK that you are willing to take.

**4. What are the different bet types you cover?**

**Ans:** Most of our automated and Expert systems cover 3 main bet types, i.e., Moneyline, Spreadline and Totals. These are explained in detail below:

· **Moneyline** or Straight Bets means "bet to win the game", including overtime/shootout. These are the regular kind of bets where you simply bet that one team will win over another based on the score. This is simple, regular, straight betting.

· **Spreadline** / Handicap + (or-)X : This means that the team you choose to bet on must "win by X or more ADDITIONAL goals". Usually when you place a bet, it's a straight bet on a team based on actual scores. But when betting on the spread lines, what you're doing is betting on adjusted scores. It's similar to handicaps... usually the stronger team's score is deducted with a minus spread value (like -1.5 or -1) OR the weaker team's score is added with a positive spread (like +1 or +1.5) in order to compare the two teams. For example, let's say there was a match in which the weaker Team A scored 4 goals and Team B scored 5. If your bookie offers +1.5 Spreadline for Team A, then Team A's score is adjusted as  $4+1.5 = 5.5$ . Since the adjusted scored 5.5 is more than Team B's actual score 5, that means Team A would win on the Spreadline (but on the regular Moneyline, it would've lost against Team B).

· **Totals** are the type of bets where your bookie offers odds based on the total sum of scores from BOTH teams. The two types of Totals are Over and Under. Let's say the bet offer is Over +5. This means you will WIN if the sum of both team's scores is above 5 goals or points or whatever. Similarly for Under 5, you will Win if the sum of both team's scores is below 5 points.

**5. What is Power Rank on the VIP Picks page?**

**Ans:** For our automated VIP Picks, we developed our own form of team ranking called '**Power Ranks**'. These ranks are calculated based on more than 80+ factors and they're indicated by the number of stars next to each team on the VIP Picks page. It's an easy and convenient way for you to take a quick glance at how STRONG and favourable a team is. So, for example, a 5 star team is definitely better than a 3 star team. The main picks we like to focus on are the 4-5 star Home teams OR 5 star Underdogs. These are the two main picks that have proved to be the most profitable, so stick with these for now.

**6. I lost my 5 star Pick, if the system not working?!**

**Ans:** When investing in sports, it is very important to only follow the system CONSISTENTLY. As you will soon see for yourself, there will be losing and winning days in this process. No person or company can win every day of the week/month/year, that is just not possible! What is important to realize is that sports investing is a PROCESS. So, treat sports investing as a business, not just gambling.

**7. What does 'Win in Reg' mean?**

**Ans:** Win in regulation means your team must win in regular time before going into any overtime

**8. What is 1HOG?**

**Ans:** 1HOG is an abbreviation for the 1ST Half Over 0.5 GOALS, which means that we are placing a bet for at least 1 Goal in the First Half of the same. Usually, the majority waits for odds around 1.50 to make it more profitable.

**9. I see the following: GS Warriors +14.0 -120. What is -120?**

**Ans:** This is the Odds expressed in American format instead of in decimals. Some websites such as 5Dimes express the odds in American prices. It basically indicates how much you would have to stake in order to win \$100 by default. If you're not used to this, you might want to learn how to convert from American odds to the regular Decimal odds format. The basic formula goes like this:

$$\text{DecimalOdds} = 1 + |\text{AmericanOdds}|/100 \wedge X$$

where X = +1 if AmericanOdds is positive, OR -1 if it is negative

**10. Why would I need to buy Points, for e.g., in NBA?**

**Ans:** In NBA, even a difference of 1 point matters, so bookies will allow you to 'buy' points, wherein you'll have to sacrifice part of the profits in exchange for a win. It's normal to buy 1-1.5 points usually.

**11. The Line has changed, so what do I now?**

**Ans:** It's not arbing and a small line or odd change does not matter in a long run. You can also buy points to match the line!

**12. I follow 2 systems. System 1 says bet 3 units on the Cubs but System 2 Says bet Pirates with 8 units, but they're both in play with each other. What should I do?**

**Ans:** This might seem like there's a conflict in the pick, but that's not a problem. Simply bet the DIFFERENCE in units between the two teams, and place that bet on the team with the higher units. So, in this case, that would be 5 units on Pirates.

**13. What are ABC system plays?**

**Ans:** ABC is actually an approach to Progressive Staking. What this means is that, when there is a loss, the stake size is gradually increased according to a certain pattern of multipliers (for example 1-2-3 or 1-3-5), so that when you finally win the bet, the higher profit return from a larger stake will help to recoup from the previous losses. For more details about Progressive staking, please read this article here: [viewtopic.php?f=5&t=92](http://viewtopic.php?f=5&t=92)

**14. I am so confused, who or what do I follow?**

## QUICK REFERENCE SHEET

- The place to get your picks → <http://zcodesystem.com/vipclub/picks.php> "Hot trends" Tab!
- Moneyline means "bet to win the game" In short often referenced as ML
- Spread/ Puckline / Handicap -1 means "to win by 2 or more goals. If win by 1 goal you get a Push (refund of the bet) That's part of the system to preserve your money :)
- Don't bet -1.5 on NHL/MLB. Always use -1 instead. It is a much safer bet because of the Push in case your team wins by only 1 goal. All qualified bookies offer -1 bet few hours before the game (**not in the morning**) Those bets usually "show up" later during the day so be patient!
- Away team is listed first, Home team is listed second
- Bet 1% of your bankroll per bet. For example for \$1000 bet \$10 bets, fixed size
- **Odds may change through the day.** That is normal. Sometimes underdog can become a favorite.
- Better to place bets few hours before the game when the situation is clear. (Final prediction)
- Don't overbet! Follow 2-3 systems that you choose based on sports you like and start small (paper betting) before going "all in".
- **Follow the LIVE bets on the wall.** They help you **build your bankroll faster** and teach you how to find the bets quick in your bookie interface.
- Do not expect to win every single day. We are doing a sports investing system with a long term profit, not a one day *get-rich scam*. You will not become millionaire overnight with it and you will have losing days and weeks. That is normal. Always see the BIG picture and remember that sports investing is a **PROCESS!** Remember, our system is a proven winner in a long run!
- Do not bet only based on Stars !! Follow expert systems in "**Hot Trends**" section!!
- Open several bookie accounts. Remember you are not married to your bookie. The more bookies you have, the more markets you get access to! Choose bookies here <https://zcodesystem.com/vipclub/bookmakers.php>

**PRINT ME!**

See the big picture: remember, Sports investing is a **PROCESS**, not get rich today scam! You need to see results long term and not care much about day to day wins and losses. The system **WORKS** since 1999 and never had a losing year.

That's all for now! Follow the system and win!

## Z Code Tools to help you here with money management for system games

Sometimes you see recommendations like "Possible System play on Team X". This is the most popular bet type in MLB. It's not used much in other sports. What does it mean?

During the last 12 years we've developed several successful systems based on the money management.

This means it is pure math, no guesswork. In such system our goal is to win by units not by odds.

For example in a 3 series game we can lose 2 times and still be in profit when you finish the series!

We don't just stupidly double the unit size like in martingale like other capers do. This is too risky for the bankroll! Never do that. We use different progressions such as positive progressions, Labouchère system etc to keep us in profit no matter what outcome is! That's why it is important that you follow the units when we state every "system" game! Never bet fixed units on the system games!

Place system games like normal fixed stakes - just follow the units plan carefully! This way even if you lose 2 out of 3 games you are still in profit in most cases!

Use **System Calculator** if you are betting on the system progressions based on our predictions:

	Original Bet A	Bet B	Bet C	Bet D
Points:	200	410.53	842.66	1729.67
Odds:	1.95 <small>(old odds)</small>	1.95	1.95	1.95
Profit:	190	390 <small>= 190 + 200</small>	800.53 <small>= 190 + 610.53</small>	1643.19 <small>= 190 + 1453.19</small>

This is a point calculator for the system bets. It has 3 step progression A, B, C. A is an original bet. Say it's 100 points. Then enter the odds for it and it will show the profit you expected to win. If you lose bet A you can enter the odd for bet B and it will calculate the amount of bet B you need to bet to recover the loss from bet A plus get the original desired profit.

**Power rankings** [http://zcodesystem.com/nhl\\_power\\_rankings.php](http://zcodesystem.com/nhl_power_rankings.php)

One of the great features of Zcode system will be automatically updated daily power rankings for NHL, NBA, MLB and weekly for NFL. They show the real condition and shape of the teams based on the internal system indicators. You can compare how they differ from the traditional Standings (Place in Ratings) that you can find on public websites like Covers or NHL.com that are usually updated weekly and become outdated too fast.

The value of such table is huge for the professional bettor because it shows you the real **CURRENT** power of the team, not the traditional "general" power shown by public standings tables. let me give you example. Team A won a lot of games in October and stays on top of the division with the big amount of points, however it lost 7 out of last 10 games. The traditional standings tables will still show a high position for the team that has collapsed and currently not playing well at all giving you fake indications of the strength!

Of course power rankings is not the only thing that matters but it is one of the most important indicators of the team current state and power.

## Totals Predictor

[http://zcodesystem.com/totals\\_predictor/?team1=NY%20Islanders&team2=Boston](http://zcodesystem.com/totals_predictor/?team1=NY%20Islanders&team2=Boston)

The Totals Predictor is a unique tool developed based on Jonathan Ma ideas. Here is how it works. For every team we are building 2 lines.

The blue line is the Over/Under line. We assigned a value of 1 for the Overs and a value of -1 for the Unders. For the purpose of this prediction tool, over/unders are based on 5.5. Any game with a push on 5 is considered an under for 5.5.

The red line is the differential between the over/under based on the last 10 games. Examples: A 6-4 in favor of over would be +2. A 3-7 in favor of under would be -4.

Next step is to compare the lines and see the repeated patterns. For example if you see both teams are trending up on the red line this means they score much more goals than usual and the game will probably go Over 5.5!

## Tips for winning with Totals Predictor

1. Use progressions like 1x - 3x - 5x because odds on Over 5 or Under 5.5 usually are around 1.6-1.7 which is too low to be profitable on a flat betting. The chance to lose over 4 totals in a row is very low.
2. Ignore all games with unclear signal. It's better to pass than lose.
3. Check the starting goalies.
4. Remember teams tend to score less on the road even if they score a lot at home
5. Compare your prediction to what Zcode experts say about the game in the VIP section to make sure you don't go against the experts opinion.

### 4. Power Ranking Indicator

One of the great features of Zcode system is the automatically updated daily power rankings. They show the real condition and power of the teams based on the internal system indicators.

However how can we learn how this power changes over time to predict the future games? This is where Zcode Power Rankings Indicator comes to your help! It shows you how Power Ranks of the teams changed over the course of the season and gives you chance to compare them easily! The higher power rank on the chart the **BETTER!** (we display it as 30 minus power rank).

It helps you understand if your team is stable (straight chart) or unstable (shaky chart with big dips) and where it is trending now. Enjoy!

### 5. Head to Head Tool

Zcode Head-to-Head Tool is a unique helper that gives you the entire information on how 2 teams performed against each other: the results, the odds, who won the game etc. The most important information that makes it really powerful is Team Statuses. Now you can analyse head-to-head performances and find out what was the team status during those games. If you find a team that won most of the recent meetings and the status is proper, it's a very strong confirmation that it will win once again.

Of course you can't base the whole pick only on head-to-head results but it will give you an important extra confirmation to the other Zcode predictions and picks to help you win!

# Ideas to maximize your profit (FOR EXPERTS ONLY)

- *When the odd is too low (for example on home favourites like Boston playing against super weak last place team) you can risk more by putting bet on “win in regulation” instead of “moneyline including OT”. Usually the odd is better. Some bookies like bet365 also offer Spread-2 Bet for such games for maximizing profit*
- *On some bookies like 5Dimes you can bet super profitable bet like “underdog-1” spread. Use it for 5 star dogs to maximize the profit*
- *When your strong team is known to score a lot and a weak one has poor defence and goalie use Team Total Over 2.5 to maximize the profit*
- *When the odd is super low and you think “things are too good to be true” and expect an upset you can place a hedging parlay on the underdog moneyline parlayed with something else.*
- *Parlay “5 star underdog” on +1.5 spread with something else – it has very high winning rate.*
- *Check what other experts think of the game.*
- *Check line reversals 5-10 mins before the game starts to confirm your bets and bet against the public.*
- *Follow expert systems in "**Hot Trends**" section!!*
